

Common Application | Undergraduate

Sydney Hart | CAID: APP_011 | Fall 2026

Applicant information

App ID	APP_011
First Name	Sydney
Last Name	Hart
Date Of Birth	7/31/08
Mailing Address	1010 Example Lane, Raleigh, NC 27601
Primary Phone Number	919-555-0110
Email Address	sydney.hart.011@example.com
Gender	Female
Ethnicity	Hispanic
Country	USA
Region	Southeast

Education and application details

Sydney Hart | CAID: APP_011 | Fall 2026

Name of HS	Raleigh High School
Counselor Name	Emerson Chen
Intended Major	Public Health
Admission Year	2026
Admission Term	F
Unweighted GPA	96
Weighted GPA	102
Rank	Not provided
Superscored SAT Score	1420
Superscored ACT Score	Not provided

AP Courses

AP Calculus AB, AP Statistics, AP English Language, AP Environmental Science, AP Physics C Electricity and Magnetism, AP US History, AP World History, AP French Language, AP Computer Science Principles, AP European History

Total APs

10

Personal essay

Sydney Hart | CAID: APP_011 | Fall 2026

Prompt: Describe an experience that changed how you think or learn.

A question before an answer

At a neighborhood meeting, I noticed that two people could describe the same health problem and mean very different things. One wanted clearer information; the other needed a practical way to use it. I began to wonder what happens between a good recommendation and the moment someone can actually follow it.

My first response was to make the problem smaller than it really was. I wanted a neat explanation and a quick result. When that did not work, I felt embarrassed by how much I had assumed. Looking back, the useful part of the experience began when I admitted that I needed more information. I wrote down what I knew, what I was guessing, and what I still needed to ask. That simple separation helped me move forward without pretending to be certain.

The next attempt was slower. I listened to another perspective, changed one part of my approach, and checked whether the change made sense. I learned that revision is more than replacing a wrong answer with a right one. Sometimes it means changing the question itself. I also learned to explain my choices clearly enough that someone else could challenge them. An idea became more useful when it could survive a conversation rather than only look convincing in my notebook.

That lesson has followed me into ordinary parts of my school life. When I do not understand a reading, I try to identify the sentence where I lost the argument. When a group disagrees, I ask what each person is trying to accomplish. These habits do not solve every problem, and I still sometimes rush toward an answer. But they give me a way to begin again. I am becoming more comfortable saying that I have not figured something out yet, provided that I can describe the next step I will take.

My interest in Public Health comes partly from this experience. I want to study how ideas meet the complicated conditions of actual lives. I hope college will give me stronger methods, unfamiliar perspectives, and people who will question my assumptions. I do not expect every class to confirm the direction I have chosen. I want some of them to make me reconsider it. Learning should enlarge the questions I can ask as well as the answers I can offer.

The lesson I carry with me is to listen to the person behind a statistic. It sounds modest, but it changes how I work. I now see patience, curiosity, and a willingness to revise as practical responsibilities. I want to contribute to a college community by taking other people seriously, making my reasoning clear, and continuing when a first attempt fails. The moment that matters most to me is no longer the moment I can announce an answer. It is the moment I understand enough to take a more thoughtful next step.

Essay is fictional and generated for this prototype. It is embedded in this CommonApp document.
