

Confidential Recommendation

Applicant APP_007 • Recommendation 2

Application ID	APP_007
Applicant	Avery Lane
Entry term	Fall 2026

To the Admissions Committee:

I am pleased to recommend Avery Lane. I have known Avery for two semesters in an advanced seminar and a collaborative capstone project. Across that time, I have seen a thoughtful student who prepares carefully, responds constructively to feedback, and contributes to the learning of others.

One example came through environmental club volunteer. Avery helped the group move from broad intentions to a workable plan, checked that responsibilities were understood, and followed up when deadlines changed. The strongest feature of this work was not simply the final product; it was the student's ability to make progress without taking ownership away from teammates.

Academically, Avery approaches difficult material with persistence. Questions are specific, revision is taken seriously, and connections are made between classroom ideas and an emerging interest in Physics. This combination of discipline and intellectual curiosity should translate well to college-level work.

I recommend Avery Lane with confidence. The student will bring reliability, curiosity, and a collaborative spirit to a university community. Please contact the school if additional context would be useful.

Sincerely,
Dr. Morgan Lee
Teacher, Columbus High School
