Undergraduate Admissions Policy Handbook | Synthetic teaching and prototype document

Policy version 1.0 | Published 2026-09-29 | 15 policy sections

SIMULATION NOTICE

Riverview State University and every policy in this handbook are fictional. These rules apply only to the supplied synthetic applicant packets; their historical application years do not change the simulated policy version.

How to use this handbook

Each section has a stable policy ID shared with data/policies.yaml. The YAML file is the structured rule source for the prototype. This PDF is the human-readable source for policy retrieval and citations. Cite the policy ID and the applicant document behind each finding.

Workflow states are not admissions outcomes. An incomplete file needs a required item; counselor review handles ambiguities and exceptions; an unreadable file may need a replacement. `READY_FOR_HUMAN_REVIEW` means an officer can begin review, not that the applicant has been admitted.

If multiple policies apply, record every finding and display the highest-priority workflow state: `STOPPED`, `COUNSELOR_REVIEW`, `REPLACEMENT_REQUESTED`, `INCOMPLETE`, then `READY_FOR_HUMAN_REVIEW`. A stopped case is handed to a counselor. Never discard lower-priority findings.

Unknown applicability goes to a counselor. A missing required file is incomplete; a present but unreadable file follows `POL-READ-01`. Staff verify official status, waiver documentation, and credential evaluator recognition.

Application materials and eligibility evidence

POL-FT-01 | First-Year Core Materials

Applies to: First-Year applicants | Team policy

Rule: An official transcript, essay, and one recommendation are required. Test scores are optional.

System action: Incomplete if a required item is missing.

POL-TR-01 | Transfer Core Materials

Applies to: Transfer applicants | Team policy

Rule: Official transcripts from all attended institutions and a personal statement are required. A recommendation is not required.

System action: Incomplete if a required transcript or statement is missing.

POL-INT-01 | English Proficiency

Applies to: Applicants educated in a non-English curriculum | Team policy

Rule: Approved English-proficiency evidence is required unless a documented waiver applies.

System action: Incomplete when evidence is missing; route waiver requests to a counselor.

POL-INT-02 | International Credential Evaluation

Applies to: Applicants with international education | Team policy

Rule: A recognized credential evaluation is required for non-U.S. academic records.

System action: Incomplete when the evaluation is missing.

POL-TEST-01 | Test-Optional Review

Applies to: First-Year applicants | Team policy

Rule: SAT or ACT scores are optional for standard application completeness.

System action: Do not mark incomplete solely because a test score is absent.

Document integrity and exceptions

POL-ID-01 | Applicant and Document Matching

Applies to: All applicants | Prototype addition

Rule: A document must be linked to the correct applicant using its applicant ID and available identifying details. Conflicts must be resolved before the document is used as evidence.

System action: Route mismatched or uncertain documents to counselor review; do not merge packets automatically.

POL-DUP-01 | Duplicate Documents

Applies to: All applicants | Team policy

Rule: When duplicate versions conflict or cannot be identified as authoritative, staff must review both versions.

System action: Route to counselor review; do not discard automatically.

POL-DATE-01 | Date Consistency

Applies to: All applicants | Team policy

Rule: Document issue dates and attendance dates must be chronologically consistent with the application record.

System action: Route inconsistent or impossible dates to counselor review.

POL-COURSE-01 | Coursework Interpretation

Applies to: All applicants | Team policy

Rule: Prerequisite coursework must be identifiable from course titles, credits, or supporting documentation.

System action: Route ambiguous coursework to counselor review.

POL-READ-01 | Unreadable Attachments

Applies to: All applicants | Team policy

Rule: Documents must be legible enough to verify identity, dates, grades, and issuing institution.

System action: Request a replacement or route to counselor review.

POL-EXC-01 | Nonstandard Exceptions

Applies to: All applicants | Team policy

Rule: Cases outside published standard rules must not be decided automatically.

System action: Stop automated processing and route to counselor review.

Evidence, context, and human authority

POL-EVID-01 | Evidence and Unknown Values

Applies to: All applicants | Prototype addition

Rule: Every factual review finding must cite its source document or policy section. Missing, unreadable, or unsupported facts must be labeled unknown rather than inferred.

System action: Reject unsupported findings from the review draft and route unresolved material facts to human review.

POL-AP-01 | Academic Opportunity Context

Applies to: First-Year applicants | Prototype addition

Rule: Interpret AP participation against the high school's offered courses and four-year AP cap. A school with no AP offerings must not be treated as a lack of student rigor. AP course grades are not AP exam scores.

System action: Show school context in the dossier; mark unavailable AP exam performance unknown and leave academic judgment to the officer.

POL-ESSAY-01 | Personal Statement Human Review

Applies to: All applicants | Prototype addition

Rule: The system may check whether a personal statement is present, but only an admissions officer may read and evaluate its content.

System action: Exclude personal-statement content from model prompts, retrieval indexes, and AI-generated evaluations; send it to the human review queue.

POL-HUMAN-01 | Human Admissions Authority

Applies to: All applicants | Prototype addition

Rule: AI findings and workflow statuses are advisory. An authorized admissions officer makes and records every final admit, deny, or waitlist decision after reviewing the application and cited evidence.

System action: Stop at READY_FOR_HUMAN_REVIEW or an exception handoff; never write a final admissions decision automatically.

Implementation and interpretation notes

Use a fixed sequence: match the packet to the applicant, inventory required materials, apply conditional requirements, flag document conflicts or readability problems, draft cited findings, validate the draft, and hand off to an officer. Never allow the model to read a personal statement.

POL-AP-01 depends on the linked high-school profile. A four-year AP cap of zero means no AP opportunity at that school; it is not a negative academic finding. AP exam performance is unknown when no exam report exists.

POL-COURSE-01 flags uncertainty in identifying prerequisite coursework. It does not define a new prerequisite or permit an automated admission decision. Other program-specific prerequisites would require a separately published policy.

For testing, compare the detected policy IDs, workflow status, cited source documents, and human handoff against expected results. In particular, missing SAT/ACT scores alone must not trigger INCOMPLETE for first-year applicants.
