EDUCATION

Secondary school	Lakeside STEM Magnet School
School profile ID	HS-003
School type	Public Magnet
Expected graduation year	2023
School report	Submitted as a separate supporting document
Transcript	Submitted separately when present

ACADEMIC HISTORY

Cumulative unweighted GPA	3.86
Cumulative weighted GPA	4.34
Class rank	Not reported
AP courses reported	11
IB courses reported	0
Honors courses reported	0

TESTING

SAT	1510
ACT	Not reported
AP coursework/testing notes	None reported
Official score reports	Stored as separate supporting documents when supplied

HONORS AND DISTINCTIONS

Synthetic Common Application

APPLICANT APP-008 | SOURCE RECORD 981

1	Research award from government Reported by the applicant.
2	Research grant from school Reported by the applicant.
3	Description: Largest received Reported by the applicant.
4	National mathematics competition finalist Reported by the applicant.
5	Description: Ranked in top 50 Reported by the applicant.
6	International mathematics competition finalist Reported by the applicant.
7	Description: Ranked 350 out of 30k Reported by the applicant.
8	Received stipend from school Reported by the applicant.

ACTIVITIES

1. Research

Participation: grades 10-12; 4 hours/week; 24 weeks/year

3 research publications on AI's impact on public health; 2 international conference podium presentations; invited speaker at major school event. As part of Research, the applicant defined small project questions, documented procedures, tested possible solutions, and presented findings to peers. The work reinforced an interest in Applied Math by connecting careful analysis with practical decision-making.

2. Work (Paid)

Participation: grades 9-11; 4 hours/week; 30 weeks/year

Created and maintain database and registration platform, which increased client volume by 17% annually; was promoted from volunteer. As part of Work (Paid), the applicant participated in weekly planning, completed assigned responsibilities, documented progress, and helped resolve unexpected problems. Over time, the applicant became more comfortable taking initiative while also asking for feedback when expectations were unclear.

Synthetic Common Application

APPLICANT APP-008 | SOURCE RECORD 981

3. Science/Math

Participation: grades 9-12; 3 hours/week; 35 weeks/year

Network of unique camps for students, taught by experienced tutors; 200+ total students in 2 years. As part of Science/Math, the applicant defined small project questions, documented procedures, tested possible solutions, and presented findings to peers. The work reinforced an interest in Applied Math by connecting careful analysis with practical decision-making.

4. Religious

Participation: grades 9-11; 4 hours/week; 36 weeks/year

President of two culture-related clubs in my school. As part of Religious, the applicant participated in weekly planning, completed assigned responsibilities, documented progress, and helped resolve unexpected problems. Over time, the applicant became more comfortable taking initiative while also asking for feedback when expectations were unclear.

5. Academic

Participation: grades 11-12; 4 hours/week; 35 weeks/year

President of school's subject honors society, coordinated and co-wrote competition for 100 students, doubled club membership. As part of Academic, the applicant participated in weekly planning, completed assigned responsibilities, documented progress, and helped resolve unexpected problems. Over time, the applicant became more comfortable taking initiative while also asking for feedback when expectations were unclear.

6. Community Service (Volunteer)

Participation: grades 9-12; 7 hours/week; 28 weeks/year

First-of-its-kind platform with over 1.2k students and 70+ tutors globally; 24/7 academic consulting with focus on problem-solving strategies. As part of Community Service (Volunteer), the applicant prepared materials, supported participants one-on-one, tracked recurring needs, and communicated follow-up items to the supervising adult. The experience emphasized reliability, patient communication, and the importance of adapting support to the person receiving it.

7. Social Justice

Participation: grades 9-12; 8 hours/week; 39 weeks/year

President of school's foundation against racism and intolerance; committed to ensuring equal access to opportunities; presided over non-partisan discussions to further equality within community. As part of Social Justice, the applicant participated in weekly planning, completed assigned responsibilities, documented progress, and helped resolve unexpected problems. Over time, the applicant became more comfortable taking initiative while also asking for feedback when expectations were unclear.

Synthetic Common Application

8. Internship

Participation: grades 9-12; 4 hours/week; 32 weeks/year

Modeled clinical pathways algorithms in viral infectious diseases pilot program in area of health informatics/Infectious Diseases and Global Health. As part of Internship, the applicant participated in weekly planning, completed assigned responsibilities, documented progress, and helped resolve unexpected problems. Over time, the applicant became more comfortable taking initiative while also asking for feedback when expectations were unclear.

9. Work (Paid)

Participation: grades 10-12; 6 hours/week; 34 weeks/year

Lead video editor for YouTuber with 500k subscribers; use Premiere Pro to create content with keyframes, green screens, etc. As part of Work (Paid), the applicant participated in weekly planning, completed assigned responsibilities, documented progress, and helped resolve unexpected problems. Over time, the applicant became more comfortable taking initiative while also asking for feedback when expectations were unclear.

RECOMMENDATIONS AND SCHOOL FORMS

Recommendation 1	Mathematics Teacher - confidential supporting document received separately
Recommendation 2	School Counselor - confidential supporting document received separately
Counselor/school report	Maintained as a separate supporting record when supplied
Applicant access	Confidential recommendations are not reproduced in this applicant PDF

PERSONAL ESSAY

Prompt: Reflect on an experience that contributed to personal growth or changed your understanding.

The first sign that I needed a better plan was the page of crossed-out notes in front of me. I was working through a group assignment whose instructions left several possible directions, and each new idea seemed to create two more questions. My instinct was to keep moving and hope the direction would become obvious. Instead, I stopped, wrote the goal in one sentence, and listed what the group could actually verify. That small decision changed the project and, more importantly, changed the way I approach unfamiliar work.

I began separating assumptions from evidence. I asked each person to explain what they thought the assignment required, then combined the answers into a checklist. Some ideas were useful, some overlapped, and some had to be set aside. The process was slower at first, but it gave everyone a clear place to contribute. By the end of the meeting, the uncertainty had not disappeared; it had become organized enough for us to act.

That experience followed me into Research. I started paying attention to the work that happens before a visible result: preparing materials, confirming responsibilities, noticing who has not spoken, and checking whether a plan still makes sense after conditions change. I learned that leadership is not always the person with the quickest answer. Often it is the person willing to make the problem understandable and help others decide what to do next.

I also learned to become less protective of my first attempt. Earlier in high school, I sometimes treated revision as evidence that I had done something wrong. Gradually, I began to see feedback as information. A comment from a teacher could reveal a weak connection. A question from a teammate could show that my explanation made sense only to me. Revision became less about correcting a failure and more about making an idea usable by someone else.

This is one reason I am drawn to Applied Math. I enjoy the moment when scattered details begin to form a pattern, but I am equally interested in what happens after that pattern is found. Information matters when it helps someone understand a choice, improve a process, or ask a better question. I want to develop the technical and analytical foundation to do that work responsibly, while continuing to strengthen the communication skills that make the work useful.

The habits I value now are simple: define the question, document the process, invite another perspective, and be willing to change direction when the evidence requires it. These habits have helped me in classes, activities, and

Synthetic Common Application

APPLICANT APP-008 | SOURCE RECORD 981

conversations where there was no obvious first step. They have also made me more patient with uncertainty. I no longer expect every worthwhile problem to arrive with complete instructions.

In college, I hope to contribute to teams where people bring different strengths and where ideas improve through discussion. I will bring preparation, curiosity, and a willingness to complete the less visible work that keeps a project moving. I also expect to be challenged. I want classmates and professors to identify gaps in my reasoning, introduce methods I have not considered, and push me to explain my conclusions more clearly.

The crossed-out page from that first project was not a record of wasted effort. It showed the questions that eventually led to a stronger result. The lesson I carry forward is that progress does not require certainty at the beginning. It requires enough patience to examine the problem, enough humility to revise, and enough commitment to continue. That is the approach I hope to bring to the study of Applied Math and to the broader Riverview State community.

UNIVERSITY-SPECIFIC WRITING

Prompt 1: Why do you want to study Applied Math at Riverview State University?

I want to study Applied Math because it brings together the questions I most enjoy: how information can be examined carefully, how competing explanations can be tested, and how a conclusion can be communicated to people who need to act on it. My classes have given me an introduction to these habits, while my work in Research has shown me why they matter outside a classroom.

At Riverview State University, I would look for foundational coursework in Applied Math, opportunities to apply concepts through projects, and classes that require students to explain the reasoning behind their work. I am especially interested in learning how professionals recognize incomplete evidence, document assumptions, and make responsible recommendations. Those skills would help me move from informal problem-solving toward a more rigorous understanding of the field.

I would also bring a collaborative approach. I tend to organize open questions, document next steps, and ask for feedback before a project is finished. I hope to contribute those habits to group assignments and student organizations while learning from classmates who approach problems differently.

Prompt 2: How would you contribute to the Riverview State community?

The experience I would bring to the Riverview State community is my involvement in Research. It taught me that participation becomes meaningful when people can depend on one another for both visible and routine responsibilities. Preparing materials, following up after meetings, and helping someone understand the next step can matter as much as leading the final presentation.

On campus, I would seek organizations connected to service, academic interests, and peer mentoring. I would be comfortable beginning as a learner, taking responsibility for a defined task, and gradually contributing more as I understand the group. I am interested in communities that value thoughtful preparation and make room for members with different levels of experience.

I hope my contribution would be measured not only by the events I attend, but by whether the people working with me feel supported and whether the group becomes better organized over time. That is the kind of campus involvement that would help me grow while also being useful to others.
