

Common Application | Undergraduate

Parker Lopez | CAID: APP_013 | Fall 2026

Applicant information

App ID	APP_013
First Name	Parker
Last Name	Lopez
Date Of Birth	11/8/06
Mailing Address	1012 Demo Drive, Portland, OR 97205
Primary Phone Number	503-555-0112
Email Address	parker.lopez.013@example.com
Gender	Female
Ethnicity	White
Country	USA
Region	West

Education and application details

Parker Lopez | CAID: APP_013 | Fall 2026

Name of HS	Portland High School
Counselor Name	Blair Kim
Intended Major	Accounting
Admission Year	2026
Admission Term	F
Unweighted GPA	3.47
Weighted GPA	3.69
Rank	Not provided
Superscored SAT Score	Not provided
Superscored ACT Score	31

AP Courses

AP US History, AP Macroeconomics, AP Chemistry, AP Art History, AP Research

Total APs

5

IB Courses

Not provided

Total IBs

Not provided

Activities

School art club member

Awards

Community service recognition, School leadership award, Robotics competition team award

Hooks

Not provided

Personal essay

Parker Lopez | CAID: APP_013 | Fall 2026

Prompt: Describe an experience that changed how you think or learn.

What the numbers leave out

In art club, we were deciding how to divide a small supply budget. My first instinct was to split it evenly. Then I saw that one project needed only paper while another required materials we could share. Fairness turned out to require a conversation before it required arithmetic.

My first response was to make the problem smaller than it really was. I wanted a neat explanation and a quick result. When that did not work, I felt embarrassed by how much I had assumed. Looking back, the useful part of the experience began when I admitted that I needed more information. I wrote down what I knew, what I was guessing, and what I still needed to ask. That simple separation helped me move forward without pretending to be certain.

The next attempt was slower. I listened to another perspective, changed one part of my approach, and checked whether the change made sense. I learned that revision is more than replacing a wrong answer with a right one. Sometimes it means changing the question itself. I also learned to explain my choices clearly enough that someone else could challenge them. An idea became more useful when it could survive a conversation rather than only look convincing in my notebook.

That lesson has followed me into ordinary parts of my school life. When I do not understand a reading, I try to identify the sentence where I lost the argument. When a group disagrees, I ask what each person is trying to accomplish. These habits do not solve every problem, and I still sometimes rush toward an answer. But they give me a way to begin again. I am becoming more comfortable saying that I have not figured something out yet, provided that I can describe the next step I will take.

My interest in Accounting comes partly from this experience. I want to study how ideas meet the complicated conditions of actual lives. I hope college will give me stronger methods, unfamiliar perspectives, and people who will question my assumptions. I do not expect every class to confirm the direction I have chosen. I want some of them to make me reconsider it. Learning should enlarge the questions I can ask as well as the answers I can offer.

The lesson I carry with me is to make the reasoning behind a decision visible. It sounds modest, but it changes how I work. I now see patience, curiosity, and a willingness to revise as practical responsibilities. I want to contribute to a college community by taking other people seriously, making my reasoning clear, and continuing when a first attempt fails. The moment that matters most to me is no longer the moment I can announce an answer. It is the moment I understand enough to take a more thoughtful next step.

Essay is fictional and generated for this prototype. It is embedded in this CommonApp document.
