SUBMISSION RECORD

Application ID	APP-009
Application cycle	2022
Submitted	October 15, 2021
Receiving institution	Riverview State University
Admission plan	Regular Decision
Intended major	Aerospace, Mechanical Engineering
Source record	426
Processing designation	Storage, compliance, and human review only

APPLICANT INFORMATION

Applicant name	Applicant APP-009
Permanent residence	West Coast
Applicant email	app-009@synthetic.example
Applicant telephone	Not retained in research dataset
Citizenship information	Not retained in research dataset

Synthetic Common Application

EDUCATION

Secondary school	Lakeside STEM Magnet School
School profile ID	HS-003
School type	Public Magnet
Expected graduation year	2022
School report	Submitted as a separate supporting document
Transcript	Submitted separately when present

ACADEMIC HISTORY

Cumulative unweighted GPA	3.75
Cumulative weighted GPA	4.25
Class rank	Not reported
AP courses reported	0
IB courses reported	0
Honors courses reported	0

TESTING

SAT	1510
ACT	Not reported
AP coursework/testing notes	None reported
Official score reports	Stored as separate supporting documents when supplied

HONORS AND DISTINCTIONS

Synthetic Common Application

APPLICANT APP-009 | SOURCE RECORD 426

1	Regional Science Fair finalist Reported by the applicant.
2	Description: Science fair project was major-related. Reported by the applicant.
3	Presidential Award for Educational Achievement Reported by the applicant.
4	Academic Honor Roll Reported by the applicant.
5	MYP Certificate/Diploma Reported by the applicant.
6	Second team all-conference for HS soccer Reported by the applicant.

ACTIVITIES

1. Robotics Team Participation: grades 10-12; 3 hours/week; 38 weeks/year Started a robotics team as a freshman and team captain. Won state championship and am responsible for building and designing robot. As part of Robotics Team, the applicant defined small project questions, documented procedures, tested possible solutions, and presented findings to peers. The work reinforced an interest in Aerospace, Mechanical Engineering by connecting careful analysis with practical decision-making.
2. Varsity and Club Soccer Participation: grades 10-12; 2 hours/week; 38 weeks/year All 4 years, team captain for both in senior year. State champion with club team. As part of Varsity and Club Soccer, the applicant attended practices, reviewed performance with teammates, maintained equipment, and supported team preparation for competitions. The experience strengthened time management, resilience, and accountability to a team.
3. Volunteer at tech nonprofit Participation: grades 9-11; 3 hours/week; 40 weeks/year Salvaged parts from donated computers to create new computers for underprivileged people. 80 hours over 2 years. As part of Volunteer at tech nonprofit, the applicant prepared materials, supported participants one-on-one, tracked recurring needs, and communicated follow-up items to the supervising adult. The experience emphasized reliability, patient communication, and the importance of adapting support to the person receiving it.

Synthetic Common Application

APPLICANT APP-009 | SOURCE RECORD 426

4. Basketball Coach and Volunteer at local library

Participation: grades 10-12; 6 hours/week; 32 weeks/year

Shelve books and customer service at Library. Head Coach for an elementary school basketball team at YMCA. 150 hours total over 4 years. As part of Basketball Coach and Volunteer at local library, the applicant prepared materials, supported participants one-on-one, tracked recurring needs, and communicated follow-up items to the supervising adult. The experience emphasized reliability, patient communication, and the importance of adapting support to the person receiving it.

5. Summer Camp Counselor

Participation: grades 11-12; 7 hours/week; 31 weeks/year

Helped conduct fun STEM activities using scratch programming for elementary school kids through a virtual summer camp. As part of Summer Camp Counselor, the applicant participated in weekly planning, completed assigned responsibilities, documented progress, and helped resolve unexpected problems. Over time, the applicant became more comfortable taking initiative while also asking for feedback when expectations were unclear.

6. American Heart Association

Participation: grades 9-11; 3 hours/week; 26 weeks/year

Founder and officer at school's chapter. Distributed posters around school to increase awareness about heart diseases, made videos against tobacco use, and volunteered at local food bank a lot. As part of American Heart Association, the applicant practiced consistently, revised work after critique, contributed original ideas, and helped prepare material for public presentation. The activity developed creative discipline and an appreciation for how individual preparation supports a collective result.

7. Soccer Referee

Participation: grades 11-12; 3 hours/week; 25 weeks/year

Refereed around 50 soccer games throughout high school during summer breaks. As part of Soccer Referee, the applicant attended practices, reviewed performance with teammates, maintained equipment, and supported team preparation for competitions. The experience strengthened time management, resilience, and accountability to a team.

8. National Honor Society

Participation: grades 9-11; 3 hours/week; 25 weeks/year

Organized and hosted multiple events for students at my high school throughout the year, e.g., volunteering opportunities at a local farm, school hikes. As part of National Honor Society, the applicant participated in weekly planning, completed assigned responsibilities, documented progress, and helped resolve unexpected problems. Over time, the applicant became more comfortable taking initiative while also asking for feedback when expectations were unclear.

Synthetic Common Application

APPLICANT APP-009 | SOURCE RECORD 426

9. Math Tutor

Participation: grades 9-12; 2 hours/week; 38 weeks/year

Held weekly tutoring sessions with students who needed help with math at school. Also participated in local math festivals with friends. As part of Math Tutor, the applicant prepared materials, supported participants one-on-one, tracked recurring needs, and communicated follow-up items to the supervising adult. The experience emphasized reliability, patient communication, and the importance of adapting support to the person receiving it.

10. Japanese National Honor Society

Participation: grades 10-12; 5 hours/week; 27 weeks/year

Create decorations for school events conducted by JNHS. Also tutored middle school students once a week in Japanese. As part of Japanese National Honor Society, the applicant participated in weekly planning, completed assigned responsibilities, documented progress, and helped resolve unexpected problems. Over time, the applicant became more comfortable taking initiative while also asking for feedback when expectations were unclear.

RECOMMENDATIONS AND SCHOOL FORMS

Recommendation 1	IB Psych teacher - confidential supporting document received separately
Recommendation 2	IB Math teacher - confidential supporting document received separately
Counselor/school report	Maintained as a separate supporting record when supplied
Applicant access	Confidential recommendations are not reproduced in this applicant PDF

PERSONAL ESSAY

Prompt: Reflect on an experience that contributed to personal growth or changed your understanding.

The first sign that I needed a better plan was the page of crossed-out notes in front of me. I was working through a recurring volunteer responsibility that required patience and consistent follow-through, and each new idea seemed to create two more questions. My instinct was to keep moving and hope the direction would become obvious. Instead, I stopped, wrote the goal in one sentence, and listed what the group could actually verify. That small decision changed the project and, more importantly, changed the way I approach unfamiliar work.

I began separating assumptions from evidence. I asked each person to explain what they thought the assignment required, then combined the answers into a checklist. Some ideas were useful, some overlapped, and some had to be set aside. The process was slower at first, but it gave everyone a clear place to contribute. By the end of the meeting, the uncertainty had not disappeared; it had become organized enough for us to act.

That experience followed me into Robotics Team. I started paying attention to the work that happens before a visible result: preparing materials, confirming responsibilities, noticing who has not spoken, and checking whether a plan still makes sense after conditions change. I learned that leadership is not always the person with the quickest answer. Often it is the person willing to make the problem understandable and help others decide what to do next.

I also learned to become less protective of my first attempt. Earlier in high school, I sometimes treated revision as evidence that I had done something wrong. Gradually, I began to see feedback as information. A comment from a teacher could reveal a weak connection. A question from a teammate could show that my explanation made sense only to me. Revision became less about correcting a failure and more about making an idea usable by someone else.

This is one reason I am drawn to Aerospace, Mechanical Engineering. I enjoy the moment when scattered details begin to form a pattern, but I am equally interested in what happens after that pattern is found. Information matters when it helps someone understand a choice, improve a process, or ask a better question. I want to develop the technical and analytical foundation to do that work responsibly, while continuing to strengthen the communication skills that make the work useful.

The habits I value now are simple: define the question, document the process, invite another perspective, and be willing to change direction when the evidence requires it. These habits have helped me in classes, activities, and

Synthetic Common Application

APPLICANT APP-009 | SOURCE RECORD 426

conversations where there was no obvious first step. They have also made me more patient with uncertainty. I no longer expect every worthwhile problem to arrive with complete instructions.

In college, I hope to contribute to teams where people bring different strengths and where ideas improve through discussion. I will bring preparation, curiosity, and a willingness to complete the less visible work that keeps a project moving. I also expect to be challenged. I want classmates and professors to identify gaps in my reasoning, introduce methods I have not considered, and push me to explain my conclusions more clearly.

The crossed-out page from that first project was not a record of wasted effort. It showed the questions that eventually led to a stronger result. The lesson I carry forward is that progress does not require certainty at the beginning. It requires enough patience to examine the problem, enough humility to revise, and enough commitment to continue. That is the approach I hope to bring to the study of Aerospace, Mechanical Engineering and to the broader Riverview State community.

UNIVERSITY-SPECIFIC WRITING

Prompt 1: Why do you want to study Aerospace, Mechanical Engineering at Riverview State University?

I want to study Aerospace, Mechanical Engineering because it brings together the questions I most enjoy: how information can be examined carefully, how competing explanations can be tested, and how a conclusion can be communicated to people who need to act on it. My classes have given me an introduction to these habits, while my work in Robotics Team has shown me why they matter outside a classroom.

At Riverview State University, I would look for foundational coursework in Aerospace, Mechanical Engineering, opportunities to apply concepts through projects, and classes that require students to explain the reasoning behind their work. I am especially interested in learning how professionals recognize incomplete evidence, document assumptions, and make responsible recommendations. Those skills would help me move from informal problem-solving toward a more rigorous understanding of the field.

I would also bring a collaborative approach. I tend to organize open questions, document next steps, and ask for feedback before a project is finished. I hope to contribute those habits to group assignments and student organizations while learning from classmates who approach problems differently.

Prompt 2: How would you contribute to the Riverview State community?

The experience I would bring to the Riverview State community is my involvement in Robotics Team. It taught me that participation becomes meaningful when people can depend on one another for both visible and routine responsibilities. Preparing materials, following up after meetings, and helping someone understand the next step can matter as much as leading the final presentation.

On campus, I would seek organizations connected to service, academic interests, and peer mentoring. I would be comfortable beginning as a learner, taking responsibility for a defined task, and gradually contributing more as I understand the group. I am interested in communities that value thoughtful preparation and make room for members with different levels of experience.

I hope my contribution would be measured not only by the events I attend, but by whether the people working with me feel supported and whether the group becomes better organized over time. That is the kind of campus involvement that would help me grow while also being useful to others.
